My sister

Having a skinny, pretty appearance **dangling modifier**, that is what you can see at the first sight of my sister, ~~she~~ **who** already ~~had~~ **has** her own small family, including 2 adorable sons with chubby cheeks. I **had a period time living** or **“stayed a while”**? with her family, ~~I~~ **I**. In the morning I ~~wake~~ **got** up at the same time with her, **but** she never asked me to do anything for her **like** **such as** chores or ~~watch~~ **taking care of** the kids even though she ~~is~~ **was** extremely busy or **“got hectic”**? with them all.

But ~~that~~ **one** day I woke up and helped her out, at 6:30 the two sons ~~get~~ **got** up and head **ed for** ~~to~~ school with gloomy expressions on their faces, **yet** my sister always ~~says~~ **said** or ~~does~~ **did** something nice to them **like** **“such as” is better** asking ~~“what~~ **“What** do you want to have for breakfast today, **sweeties?”** **in an affectionate tone** **wordy**, ~~the~~ **The** kids immediately **have a quick reaction and that is the way they start a new day** **wordy**. In this way, they ~~feel~~ **felt** greatly uplifted.

After making sure they ~~are~~ **were** well-prepared for school, she ~~takes~~ **took** them there and ~~stops~~ **stopped** at a market on the way back to pick up some food for the day.

It ~~is~~ **was** only just halfway over, when back home it's the time her husband ~~wakes~~ **woke** up and ~~be~~ **was** ready to work outside, ~~she is~~ **. She was** all alone at home and ~~does~~ **did** all the ~~rest of things~~ **housework**.

~~I see~~ **that usually** she almost does not have leisure time for herself, from dawn till dusk she is busy with domestic duties and picking up the kids while also running her own business. When everything seems done, she still has things to do that is teach**ing** the kids after dinner. She is such a superwoman **that** ~~when~~ she can handle all these things without whining or convincing the rest family that she is overworked and **always** anxious.

Let me use the phrase ~~“she~~ **“she** *always has a lot on her plate*” to describe my sister.

1. You are supposed to write a paragraph, not an article.

2. Things happen in your narrative, but you fail to make clear what happened in the past, and what happens in the present. This gave me a headache.
3. I find simple words everywhere. Use some “advanced” words.
4. “like” differs from “such as”.
5. You gave some examples, but there should be a central one, the focus of the writing.
